

# AWS Services Enablement Program

TD SYNEX's AWS services are designed to help organizations achieve their goals at various stages of the cloud journey. Our team can assess, migrate, optimize and deploy your customers' workloads and applications to speed transformation and modernize their IT environments.

For partners committed to growing their AWS business with TD SYNEX, we offer up to 10 hours with our Cloud and Automation Services Team at no cost to you. These hours can be used for a number of different services to help grow your AWS business, regardless of your tier status on the Amazon Partner Network or level of AWS expertise:

- Cloud Intro or Basic Cloud Strategy Overview Assessment
- Well Architected Review Assessment - Single Workload
- Well Architected Remediation Services on an existing Well Architected Review
- Subsidize Cloud Migration Acceleration Program Opportunities that do not qualify for Assess and Migrate phases (non-OLA, <MAP Lite ARR)
- Simple Greenfield Services Deployment - Compute/Storage/Networking/Database
- Simple Brownfield/Migration Services Deployment (moving a single workload to Cloud)
- Fund S3 Gateway Services and Migration
- Immersion Day (led by TD SYNEX C&A Services Team)

## How does the Services Enablement Program work?

- If interested, please fill out the form to apply. Be sure to include a description of your project and the required services. This will be reviewed by our internal team and we will reach out to you with an approval decision.
- Once approved, all services must be executed within 30 days of the date that the project SOW is signed, or by December 1<sup>st</sup> (whichever comes first).

Click the button below to apply for the Services Enablement Program.
