# Tech Data Cloud Backup on Azure

Release 1.0

## Tech Data Cloud Backup on Azure

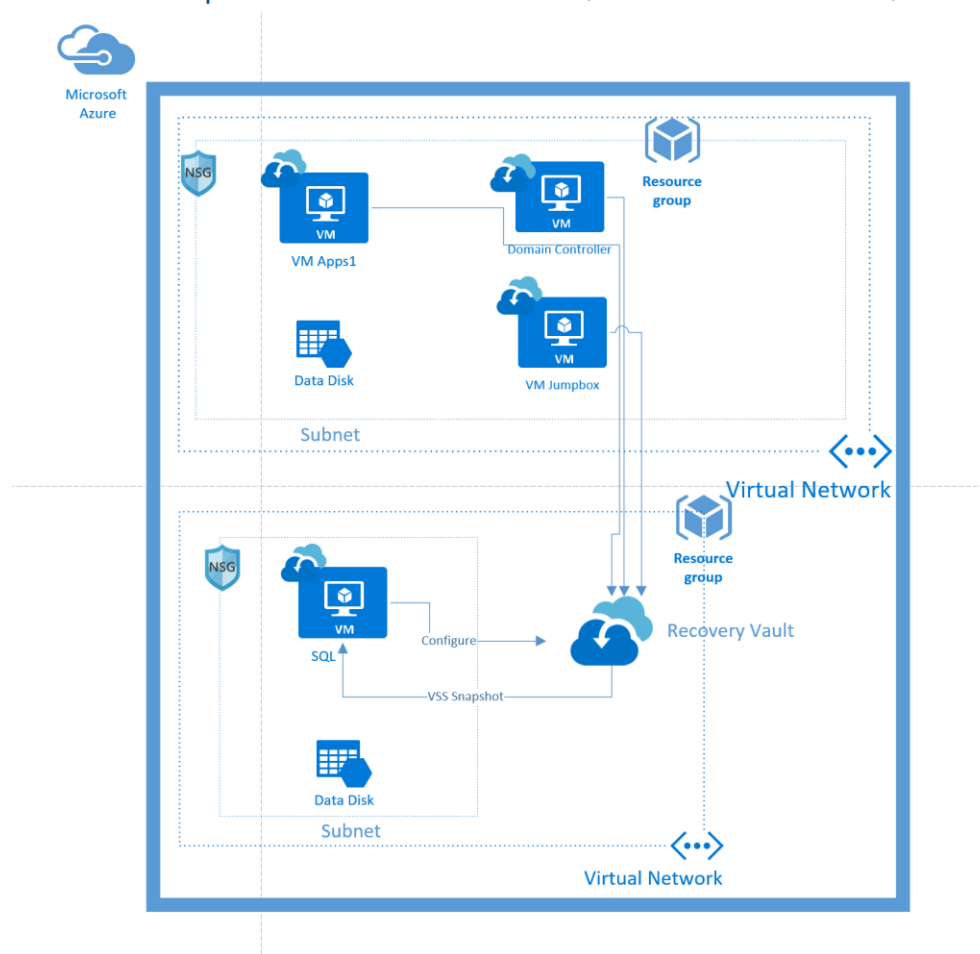

Simple and reliable server backup to Microsoft Azure. This solution offers your customers a unified solution to protect data on-premises and in the cloud.

Use this solution to set up the following backup solution on Azure

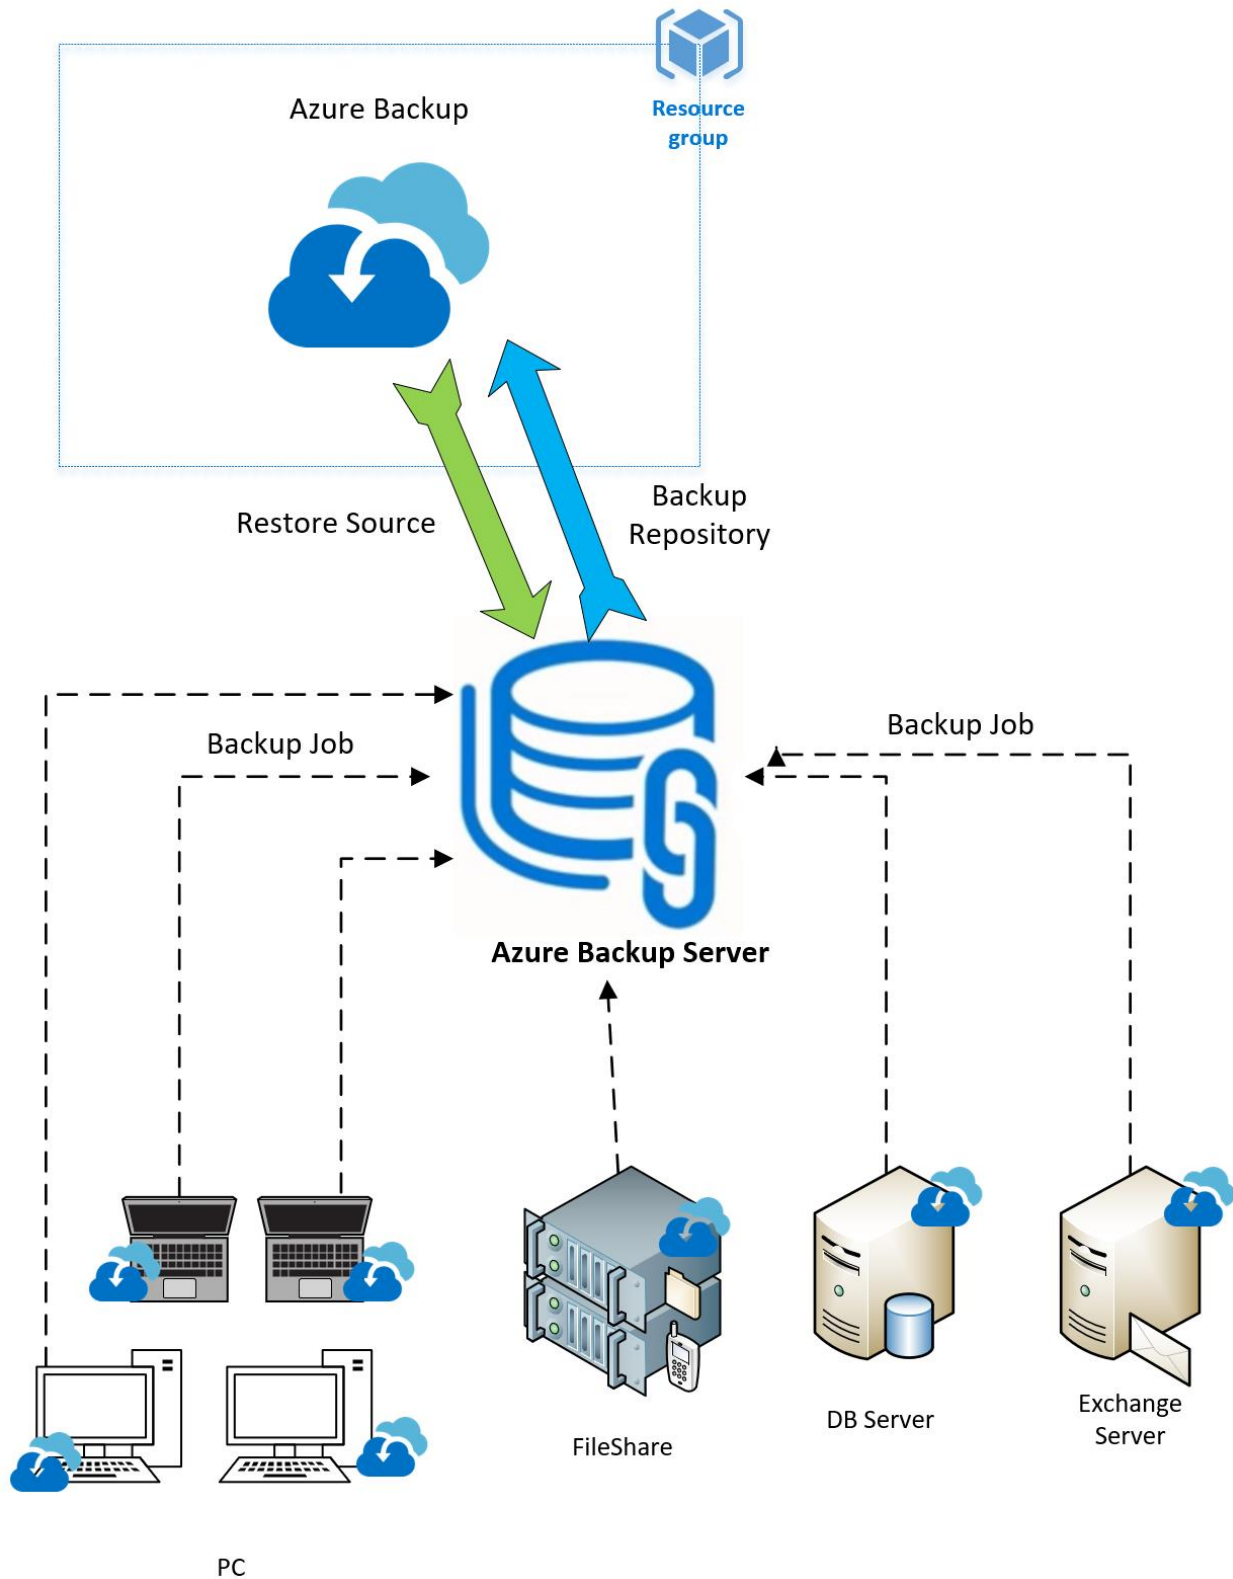

- Automated deployment of Azure services in existing or new CSP subscription
  - Azure Backup Vault / Azure Backup service
- Automated deployment for backup policies and data redundancy
- Configured policy settings for backup cycles, retention & recovery policies

## High Level Architecture

Cloud Backup for Azure Architecture (scenario: Azure VM)

Cloud Backup for Azure Architecture (scenario: On-premise to Azure)

## Solution Components [BOM]

Category	Resource	Properties	Description
VM	<b>Azure Backup Recovery Vault</b>	<b>1 Backup</b>	<p>The Azure Backup Recovery Vault will be used to stored the backup Policies, and the backup of the differents items link to it (VM / Laptop / Server...)</p> <p>The Backup will be store in a Blob Block in a Storage Account with no access managed in PaaS by the Azure Backup Recovery Vault</p>
